Safety Instructions

Electrostatic Discharges (ESD)

A sudden electrostatic discharge can destroy sensitive components. Proper packaging and earthing rules must therefore be observed. Always take the following precautions.

- Transport boards and cards in electrostatically secure containers or bags.
- Keep electrostatically sensitive components in their containers, until they arrive at an electrostatically protected workplace.
- Only touch electrostatically sensitive components when you are properly earthed.
- Store electrostatically sensitive components in protective packaging or on anti-static mats.

Grounding Methods

The following measures help to avoid electrostatic damages to the device:

- Cover workstations with approved antistatic material. Always wear a wrist strap connected to workplace as well as properly grounded tools and equipment.
- Use antistatic mats, heel straps, or air ionizers for more protection.
- Always handle electrostatically sensitive components by their edge or by their casing.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting and removing connectors or connecting test equipment.
- Keep work area free of non-conductive materials such as ordinary plastic assembly aids and Styrofoam.
- Use field service tools such as cutters, screwdrivers, and vacuum cleaners which are conductive.
- Always place drives and boards PCB-assembly-side down on the foam.

Introduction

With industrial and OEM applications increasingly adding USB devices, the need for more USB ports becomes a necessity. The HUB4P is a powered USB 2.0 4-port hub that is perfect for adding high-speed USB ports to industrial computing platforms.

The HUB4P is USB 2.0 compliant, providing a full 480M bps data rate to the host, and is backwards compatible with USB 1.1 and 1.0 devices. The powered hub includes a wall-mount AC adapter that supplies a full 500mA to each attached USB peripheral. The hub is housed in a rugged plastic enclosure and a status LED indicates proper connection to the host.

Additionally, the HUB4P-KT and HUB4P-OEM versions both include a power cable that sources +5VDC power from a standard hard drive connector and supplies a full 500mA to each attached USB peripheral.

The standard operating temperature range is 0°C to 70°C and extended temperature range (-40°C to +85°C) is optional.

Features

- Includes four powered downstream USB ports with 500mA available per port
- Status LED indicates connection to host
- USB 2.0 compliant and backwards compatible with USB 1.1 and 1.0 devices
- Native support in USB aware operating systems including Windows and Linux
- Available in extended temperature versions

Before You Get Started

What's Included

The **HUB4P** is shipped with the following items. If any of these items is missing or damaged, please contact Sealevel for replacement.

- HUB4P Sealevel High-Speed 4-Port USB 2.0 Hub
- CA356 USB Type 'A' to SeaLATCH Type 'B' Device Cable, 72" length
- TR127 Wall-mount AC power supply (5VDC @ 2.4A), locking DC connector

Advisory Conventions

Warning

The highest level of importance used to stress a condition where damage could result to the product, or the user could suffer serious injury.

Important

The middle level of importance used to highlight information that might not seem obvious or a situation that could cause the product to fail.

Note

The lowest level of importance used to provide background information, additional tips, or other non-critical facts that will not affect the use of the product.

Optional Items – HUB4P

Depending upon your application, you are likely to find one or more of the following items useful with the HUB4P. All items can be purchased from our website (http://www.sealevel.com) or by calling +1 864-843-4343.

SeaLATCH USB Type A and Type B Device Cable, 72" (Item# CA332)

The CA332 is a USB device cable with SeaLATCH USB type A and type B connectors. The metal thumbscrew on each connector provides a secure metal-to-metal connection to devices with SeaLATCH USB ports.

SeaLATCH USB Type A to USB Type B Device Cable, 72" (Item# CA355)

The CA355 is a USB device cable with a SeaLATCH USB type A connector and standard type B connector. This cable secures the hub to legacy USB peripheral devices.

USB Type A to SeaLATCH USB Type B Device Cable, 72" (Item# CA356)

The CA356 is a USB device cable with a SeaLATCH USB type B connector and standard USB Type A connector. This 72" cable is included with all Sealevel USB products with an integrated SeaLATCH USB Type B port.

USB Type A to USB Type B, 72" Device Cable (Item# CA179)

The CA179 is a 72" USB device cable that connects USB peripherals with a Type B connector to the Type A connector on a host computer. The CA179 is USB 2.0 compliant and is compatible with USB 1.1 and 1.0 devices.

OPTIONAL ITEMS – HUB4P, CONTINUED

USB Type A to USB Type A, 3 meters Extension Cable (Item# CA214)

The CA214 is a fully rated USB extension cable that allows adding 3 meters (maximum 5 meters) to any existing USB cable. The cable has a Type A male connector on one end and a Type A female connector on the other end.

USB Type A to USB Type B, 5 meters Device Cable (Item# CA215)

The CA215 is a fully rated 5-meter device cable that connects USB peripherals with a Type B connector to the Type A connector on a host PC. This cable provides the maximum 5 meters (16 feet) for a USB connection.

DIN Rail Mounting Clips (Item# DR105)

The DR105 DIN rail clips mount to the flanges with included pan head screws. The rugged plastic clips securely mount to all common profiles of 35mm DIN rail (i.e., "Top Hat" rail) and are compatible with A-series mounting rails.

What's Included – HUB4P-KT

The HUB4P-KT is shipped with the following items. If any of these items is missing or damaged, please contact Sealevel for replacement.

- HUB4P-KT Sealevel iPortholes™ High Speed 4-Port USB 2.0 Hub
- CA393 +5V Internal Power Cable

Optional Items – HUB4P-KT

Depending upon your application, you are likely to find one or more of the following items useful with the HUB4P-KT. All items can be purchased from our website (http://www.sealevel.com) or by calling +1 864-843-4343.

Internal USB Cable for Box Header Connectors, 14" (Item# CA260)

The CA260 is an embedded USB cable that has a 1x4 2mm Molex connector for connecting to Sealevel embedded USB products. The other end of the cable has a 1x4 0.1" (2.54mm) box header connector found on medium to large sized motherboards, including ATX, Micro ATX, Mini ATX, ITX, Mini ITX, and EBX form factors. The CA260 is 14" in length and uses one USB port connection on the computer motherboard.

Internal USB Cable for 1x4 2mm Box Headers, 14" (Item# CA383)

This cable is perfect for adding Sealevel I/O modules to small embedded systems. One end of the cable has a 1x4 2mm Molex connector for internal connections to Sealevel embedded USB products. The other end of the cable has a 1x4 2mm box header connector found on very small motherboards, including EPIC, 3.5" Biscuit, ETX, Nano ITX, Pico ITX, and PC/104 Small Board Computers. The CA383 is 14" in length and uses one USB port connection on the computer motherboard.

Internal USB Cable for 2mm Molex Connectors, 14" (Item# CA382)

The CA382 is an embedded USB cable that has a 1x4 2mm Molex connector on both ends for internal connections to Sealevel embedded USB products. The CA382 is 14" in length.

OPTIONAL ITEMS - HUB4P-KT, CONTINUED

SeaLATCH USB Type A and Type B Device Cable, 72" (Item# CA332)

The CA332 is a USB device cable with Sealevel's SeaLATCH locking USB type A and type B connectors. The metal thumbscrew on each connector provides a secure metal-to-metal connection to devices with SeaLATCH USB ports.

SeaLATCH USB Type A to USB Type B Device Cable, 72" (Item# CA355)

The CA355 is a USB device cable with Sealevel's SeaLATCH locking USB type A connector and standard type B connector. This cable secures the hub to legacy USB peripheral devices.

USB Type A to USB Type B, 72" Device Cable (Item# CA179)

The CA179 is a 72" USB device cable that connects USB peripherals with a Type B connector to the Type A connector on a host computer. The CA179 is USB 2.0 compliant and is compatible with USB 1.1 and 1.0 devices.

What's Included - HUB4P-0EM

The **HUB4P-OEM** is shipped with the following items. If any of these items is missing or damaged, please contact Sealevel for replacement.

- HUB4P-0EM Sealevel Embedded High Speed 4-Port USB 2.0 Hub
- CA393 +5V Internal Power Cable

OEM models of the HUB4P do not ship with a USB cable. See the available selection of USB cable options below.

Optional Items - HUB4P-0EM

Depending upon your application, you are likely to find one or more of the following items useful with the HUB4P-OEM. All items can be purchased from our website (http://www.sealevel.com) or by calling +1 864-843-4343.

Internal USB Cable for Box Header Connectors, 14" (Item# CA260)

The CA260 is an embedded USB cable that has a 1x4 2mm Molex connector for connecting to Sealevel embedded USB products. The other end of the cable has a 1x4 0.1" (2.54mm) box header connector found on medium to large sized motherboards, including ATX, Micro ATX, Mini ATX, ITX, Mini ITX, and EBX form factors. The CA260 is 14" in length and uses one USB port connection on the computer motherboard.

Internal USB Cable for 1x4 2mm Box Headers, 14" (Item# CA383)

This cable is perfect for adding Sealevel I/O modules to small embedded systems. One end of the cable has a 1x4 2mm Molex connector for internal connections to Sealevel embedded USB products. The other end of the cable has a 1x4 2mm box header connector found on very small motherboards, including EPIC, 3.5" Biscuit, ETX, Nano ITX, Pico ITX, and PC/104 Small Board Computers. The CA383 is 14" in length and uses one USB port connection on the computer motherboard.

Internal USB Cable for 2mm Molex Connectors, 14" (Item# CA382)

The CA382 is an embedded USB cable that has a 1x4 2mm Molex connector on both ends for internal connections to Sealevel embedded USB products. The CA382 is 14" in length.

OPTIONAL ITEMS – HUB4P-0EM, CONTINUED

Low Profile PCI Bracket with Locking USB Port (Item# SL-LPCI)

The SL-LPCI easily adds a SeaLATCH locking USB port to any computer with an available low profile PCI location and provides a clean, professional installation.

PCI Bracket with Locking USB Port (Item# SL-PCI)

The SL-PCI easily adds a SeaLATCH locking USB port to any computer with an available PCI location and provides a clean, professional installation.

PCI Bracket with Dual Locking USB Ports (Item# SL-PCI2)

The SL-PCI2 easily adds two SeaLATCH locking USB ports to any computer with an available PCI location and provides a clean, professional installation.

Panel Mounted Adapter with Locking USB Port (Item# SL-PM)

The SL-PM easily adds a SeaLATCH locking USB port to your enclosure, faceplate or bulkhead. This gives you the freedom to add a locking USB port wherever it is needed.

Installation

Windows 98/ME/2000/XP/Vista™ Operating Systems

- 1. The HUB4P is fully supported as a generic USB hub device in Windows 98/ME/2000/XP/Vista/7™ operating systems and requires no separate driver.
- 2. Connect the hub to power via the included wall-mount power supply (HUB4P) or through the internal power header (HUB4P-KT and HUB4P-OEM)
- 3. Using the included USB device cable, plug the HUB4P into an available USB port on your host system.
- 4. The 'Found New Hardware' screen will appear, and the hub will be automatically recognized as a generic USB hub device.
- 5. The hub is ready to use when you see the screen 'Your USB hub is installed and ready to use.'

Windows NT is not USB aware and thus cannot support this device.

LINUX SUPPORT

USB devices are supported in Linux kernel v2.4 or better. Refer to the help files included with your Linux distribution for specific instructions on adding generic USB hub devices.

For additional support, please call Sealevel Systems' Technical Support, (864) 843-4343. Our technical support is free and available from 8:00AM-5PM Eastern Time, Monday through Friday. For email support contact: mailto:support@sealevel.com.

Hardware Description

Sealevel High Speed 4-Port USB 2.0 Hub

The HUB4P is a powered USB 2.0 4-port hub that is perfect for adding high-speed USB ports to industrial computing platforms. It is USB 2.0 compliant, providing a full 480M bps data rate to the host, and is backwards compatible with USB 1.1 and 1.0 devices. The hub supplies a full 500mA to each attached USB peripheral.

The HUB4P-KT features the iPorthole™ design that is perfect for expanding industrial computing platforms using only an internal USB connection. iPorthole modules include an intelligent USB I/O board with Sealevel's innovative Porthole mounting plate for installation in a Relio or custom enclosure.

The HUB4P-OEM is ideal for industrial computing applications that require embedded USB ports. The hub is USB 2.0 compliant and is perfect for adding up to four USB ports to your embedded application. Several cables are available that connect the OEM hub to your system board and peripheral USB devices. The HUB4P-OEM includes a +5V power cable that sources power from a standard hard drive connector and supplies a full 500mA to each attached USB peripheral. Included also are 0.75" high hex standoffs for mounting of the assembly.

HUB4P

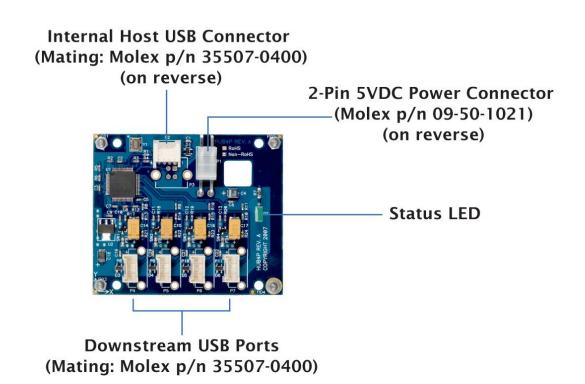

HUB4P-KT

HARDWARE DESCRIPTION, CONTINUED

HUB4P-0EM

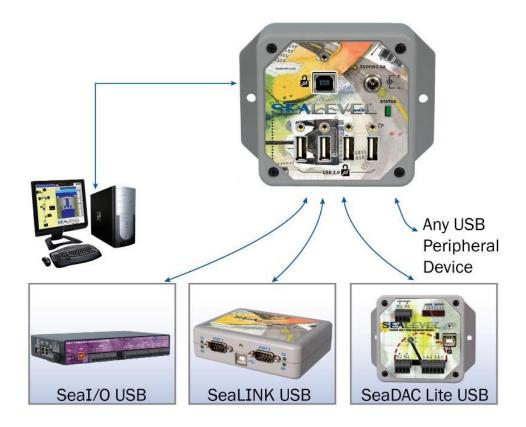

SeaLATCH® USB

The HUB4P and HUB4P-KT integrate Sealevel's SeaLATCH locking USB ports, which are fully compatible with standard USB cables. When used with SeaLATCH locking USB cables, the metal thumbscrew provides a secure metal-to-metal connection to the hub and prevents accidental cable disconnection.

Sealevel incorporates SeaLATCH locking USB ports on many USB I/O devices. Accidental cable disconnection is the most common point of failure with USB industrial I/O devices and SeaLATCH cables and connectors prevents that while being fully compatible with standard USB cables.

Examples of the HUB4P with SeaLATCH equipped Sealevel I/O devices are shown below.

SeaLATCH® USB, CONTINUED

SeaLATCH Locking USB Cables

SeaLATCH USB Connectors

SeaLATCH locking USB cables integrate a small thumbscrew into each USB connector. SeaLATCH USB cables are fully interchangeable with standard USB cables. The thumbscrew provides a secure metal-to-metal connection preventing accidental disconnection. SeaLATCH USB cables are available in three configurations.

Item# CA356

The CA356 is a 72" USB cable with a SeaLATCH type B connector and a standard USB type A connector. This cable provides a secure connection between Sealevel products with a SeaLATCH type B port and legacy USB type A ports. The CA356 is included with Sealevel devices with a SeaLATCH type B port.

Item# CA332

The CA332 is a 72" cable with both SeaLATCH type A and B connectors. This cable secures both ends of the cable to devices with SeaLATCH USB ports and offers complete protection against accidental cable disconnection.

Item# CA355

The CA355 is a 72" cable with a standard USB type B and a SeaLATCH type A connector. This cable provides a secure connection between legacy USB devices and Sealevel products with a SeaLATCH type A port.

Manufacturing

All Sealevel Systems Printed Circuit boards are built to UL 94V0 rating and are 100% electrically tested. These printed circuit boards are solder mask over bare copper or solder mask over tin nickel.

Appendix A – Troubleshooting

The HUB4P is a generic USB hub and should provide years of trouble-free service. Should the device appear to not be functioning correctly, the following tips can eliminate most common problems without the need to call Technical Support.

- 1. Make sure the power supply is properly connected. The green LED on the front of the unit will light, indicating the hub is properly powered.
- 2. Make sure the hub is connected to a USB port using the included USB cable or a quality replacement USB cable.
- 3. The hub is supported in any USB aware operating system that supports generic USB hub devices, including Windows 98/ME/2000/XP/Vista/7™ operating systems and Linux (kernel v2.4 or better). No additional drivers are required. Verify that USB support is enabled in the host system BIOS and the hub is functioning properly in the operating system. You can verify the hub is working properly in Windows using Device Manager.

If these steps do not solve your problem, please call Sealevel Systems' Technical Support, (864) 843-4343. Our technical support is free and available from 8:00 AM to 5:00 PM Eastern Time Monday through Friday. For email support, contact support@sealevel.com.

Appendix B – How To Get Assistance

Please refer to: Appendix A -- Troubleshooting Guide prior to calling Technical Support.

Begin by reading through the Trouble Shooting Guide in **Appendix A**. If assistance is still needed, please see below.

When calling for technical assistance, please have your user manual and current adapter settings. If possible, please have the adapter installed in a computer ready to run diagnostics.

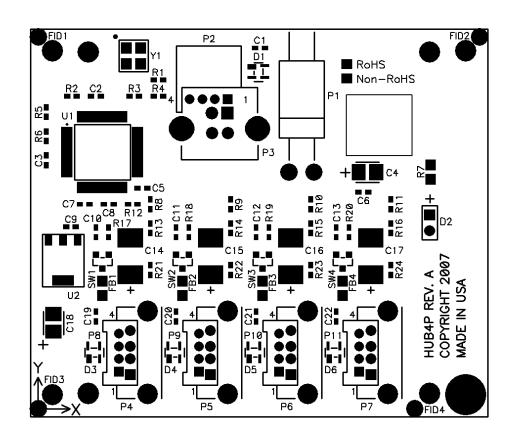

Sealevel Systems provides an FAQ section on its web site. Please refer to this to answer many common questions. This section can be found at http://www.sealevel.com/faq.asp.

Sealevel Systems maintains a web page on the Internet. Our home page address is www.sealevel.com. The latest software updates, and newest manuals are available via our web site.

Technical support is available Monday to Friday from 8:00 a.m. to 5:00 p.m. eastern time. Technical support can be reached at (864) 843-4343.

RETURN AUTHORIZATION MUST BE OBTAINED FROM SEALEVEL SYSTEMS BEFORE RETURNED MERCHANDISE WILL BE ACCEPTED. AUTHORIZATION CAN BE OBTAINED BY CALLING SEALEVEL SYSTEMS AND REQUESTING A RETURN MERCHANDISE AUTHORIZATION (RMA) NUMBER.

Appendix C – Silk Screen – HUB4P PCB

Appendix D– Compliance Notices

Federal Communications Commission (FCC) Statement

This equipment has been tested and found to comply with the limits for Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in such case the user will be required to correct the interference at the user's expense.

EMC Directive Statement

Products bearing the CE Label fulfill the requirements of the EMC directive (89/336/EEC) and of the low-voltage directive (73/23/EEC) issued by the European Commission. To obey these directives, the following European standards must be met:

- EN55022 Class A "Limits and methods of measurement of radio interference characteristics of information technology equipment"
- EN55024 "Information technology equipment Immunity characteristics Limits and methods of measurement".

This is a Class A Product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures to prevent or correct the interference.

Always use cabling provided with this product if possible. If no cable is provided or if an alternate cable is required, use high quality shielded cabling to maintain compliance with FCC/EMC directives.

Warranty

Sealevel's commitment to providing the best I/O solutions is reflected in the Lifetime Warranty that is standard on all Sealevel manufactured I/O products. Relio™ industrial computers are warranted for a period of two years and the R9 family is warranted for a five-year period from date of purchase. We are able to offer this warranty due to our control of manufacturing quality and the historically high reliability of our products in the field. Sealevel products are designed and manufactured at its Liberty, South Carolina facility, allowing direct control over product development, production, burn-in and testing. Sealevel achieved ISO-9001:2015 certification in 2018.

Warranty Policy

Sealevel Systems, Inc. (hereafter "Sealevel") warrants that the Product shall conform to and perform in accordance with published technical specifications and shall be free of defects in materials and workmanship for the warranty period. In the event of failure, Sealevel will repair or replace the product at Sealevel's sole discretion. Failures resulting from misapplication or misuse of the Product, failure to adhere to any specifications or instructions, or failure resulting from neglect, abuse, accidents, or acts of nature are not covered under this warranty.

Warranty service may be obtained by delivering the Product to Sealevel and providing proof of purchase. Customer agrees to ensure the Product or assume the risk of loss or damage in transit, to prepay shipping charges to Sealevel, and to use the original shipping container or equivalent. Warranty is valid only for original purchaser and is not transferable.

This warranty applies to Sealevel manufactured Product. Product purchased through Sealevel but manufactured by a third party will retain the original manufacturer's warranty.

Non-Warranty Repair/Retest

Products returned due to damage or misuse and Products retested with no problem found are subject to repair/retest charges. A purchase order or credit card number and authorization must be provided in order to obtain an RMA (Return Merchandise Authorization) number prior to returning Product.

How to obtain an RMA (Return Merchandise Authorization)

If you need to return a product for warranty or non-warranty repair, you must first obtain an RMA number. Please contact Sealevel Systems, Inc. Technical Support for assistance:

Available Monday – Friday, 8:00AM to 5:00PM EST

Phone 864-843-4343

Email support@sealevel.com
